

HIGH SCHOOL GRADUATE PARTICIPATION IN HIGHER EDUCATION
INDICATORS (C) (11) & (C) (12), MILESTONE 3

Completion Date – 2/15/2010 – Records match and analysis of data completed.

Data on high school graduates was collected from the New Mexico Public Education Department (PED) and data on enrollment in institutions of higher education was collected from the New Mexico Higher Education Department (HED). That data was matched on individual student records and analyzed.

Due to current year budget reductions, data on in-state private institutions and out-of-state private and public institutions cannot be collected, and the PED is not able to include that information in this analysis.

The PED and HED have a plan for collecting and analyzing the required data (see Milestone 4).
