

Information Technology Competencies	Relevant Work Experience (to be completed by applicant)	Relevant Academic Training (to be completed by applicant)	Evaluator's Comments
<p><b>A. Foundations</b></p> <p><b>1. Basic Computer and Technology Operations and Concepts</b></p> <p>Candidate will use computer systems to: run software, access, generate, and manipulate data, and publish results. They will also evaluate performance of hardware and software components of computer systems and apply basic troubleshooting strategies as needed.</p> <ul style="list-style-type: none"> <li>a. Operate a multimedia computer system with related peripheral devices to successfully install and use a variety of software packages.</li> <li>b. Use terminology related to technology appropriate to the teaching field in written and oral communication.</li> <li>c. Describe and implement basic troubleshooting techniques for multimedia computer systems with related peripheral devices.</li> <li>d. Use imaging devices.</li> <li>e. Demonstrate knowledge of uses of computers and technology in business, industry, and society.</li> <li>f. Operate a variety of audio-visual devices.</li> </ul> <p><b>2. Personal and Professional Use of Technology</b></p> <p>Candidate will apply tools for enhancing their own professional growth and productivity. They will use technology in communicating, collaborating, conducting research, and solving problems. In addition, they will plan and participate in activities that encourage lifelong learning and will promote equitable, ethical, and legal use of computer and technology resources.</p>

<ul style="list-style-type: none"> <li>a. Use productivity tools for word processing, database management, and spreadsheet applications.</li> <li>b. Apply productivity tools for creating a multimedia presentation.</li> <li>c. Use computer-based technologies including telecommunications to access information and enhance personal and professional productivity.</li> <li>d. Use computers to support problem solving, data collection, information management, communications, presentations, and decision making.</li> <li>e. Demonstrate awareness of resources for adaptive assistive devices and software for students with special needs.</li> <li>f. Demonstrate awareness of resources for culturally and linguistically diverse students.</li> <li>g. Demonstrate knowledge of equity, ethics, legal and human issues concerning use of computers and technology.</li> <li>h. Demonstrate awareness of computer and related technology resources for facilitating lifelong learning and emerging roles of the learner and the educator.</li> <li>i. Demonstrate awareness of broadcast instruction, audio/video conferencing, and other distant learning applications.</li> </ul> <p><b>3. Application of Technology to Support Teaching and Learning</b></p> <p>Candidate will apply computers and related technologies to support teaching and learning in their grade level and subject areas. They will integrate a variety of software, applications and learning tools in the teaching and learning process. Lessons developed must reflect effective grouping and assessment strategies for diverse populations.</p>			

Information Technology Competencies	Relevant Work Experience (to be completed by applicant)	Relevant Academic Training (to be completed by applicant)	Evaluator's Comments
<p>a. Explore, evaluate, and use technology resources including applications, tools, educational software, and assorted documentation.</p> <p>b. Describe best practice and appropriate assessment as related to the use of technology resources in the curriculum.</p> <p>c. Design, implement, and assess learning activities that integrate technology for a variety of grouping strategies for diverse populations.</p> <p>d. Design learning activities that foster equitable, ethical, and legal use of technology by students.</p> <p>e. Practice responsible, ethical, and legal use of technology, information, and software resources.</p> <p><b>B. Research and Theories</b></p> <p>Candidate will identify and apply educational and technology-related research, the psychology of learning, and instructional design principles in guiding use of computers and technology in education.</p> <p>a. Summarize knowledge of best practice and trends related to the use of technology to support teaching and learning.</p> <p>b. Apply theories of learning, teaching, and instructional design and their relationship to the use of technology to support teaching and learning.</p> <p>c. Identify human and equity issues concerning the use of computers and related technologies in education.</p>

<p><b>D. Operating Systems</b></p> <p>Candidate will be able to plan, install, customize, and configure the operating systems of computers and computer networks in school settings.</p> <ul style="list-style-type: none"> <li>a. Identify and describe operating systems associated with computing platforms.</li> <li>b. Use and manipulate software to effectively manage communication networks.</li> <li>c. Evaluate, troubleshoot and maintain operating systems in a variety of learning environments and administrative offices.</li> </ul> <p><b>E. Software/Hardware Design, Selection, Installation, and Maintenance</b></p> <p>Candidate will be able to identify and implement software/hardware solutions for a variety of learning environments and administrative environments.</p> <ul style="list-style-type: none"> <li>a. Research and recommend purchasing strategies and procedures for administrative and instructional software and hardware.</li> <li>b. Research and recommend technology maintenance agreements.</li> <li>c. Provide technical evaluation criteria for software and hardware and identify reliable sources.</li> <li>d. Install, maintain, inventory, and manage software.</li> <li>e. Research and recommend ethical and legal procedures for maintaining software.</li> <li>f. Provide technical evaluation criteria for adaptive assistive hardware and software for special needs population.</li> </ul>

<p>g. Facilitate instructional design principles to develop, implement, and test interactive multimedia instructional products using authoring environments.</p> <p><b>F. Information Access and Delivery</b></p> <p>Candidate will be able to implement information access and delivery resources in a variety of learning environments.</p> <p>a. Demonstrate knowledge of information access and telecommunications tools to support learning.</p> <p>b. Implement distance learning delivery systems.</p> <p>c. Assist in professional development.</p> <p>d. Install, configure, and maintain devices to store and retrieve information.</p> <p>e. Describe issues related to selecting, installing, and maintaining communication networks.</p> <p>f. Evaluate school and district technology plans and recommend improvements.</p> <p><b>G. Professional Development and Technology Leadership</b></p> <p>1. Candidate will demonstrate knowledge of issues and models related to staff development.</p> <p>a. Plan and design staff development that integrates national, state, and local standards and benchmarks.</p> <p>b. Evaluate school and district technology plans/policies and recommend improvements.</p> <p>c. Describe and identify resources for staff development.</p>

<p>2. Candidate will be knowledgeable of supervisory concepts and demonstrate skills as they relate to the use of technology-based systems in K-12 education.</p> <ul style="list-style-type: none"> <li>a. Demonstrate knowledge of strategies for and issues related to managing the change process in schools using appropriate assessment principals and techniques.</li> <li>b. Identify funding sources available at local, state, and/or national level and collaborate on development of grant proposals.</li> <li>c. Use knowledge of technology to guide the decision making process that best benefits the constituents.</li> </ul>
